MUHAMMAD IRFAN BIN MAZUKI

Software Engineer
Email: irfanmazuki9@gmail.com
Phone Number: +6011-17975766
LinkedIn: https://www.linkedin.com/in/irfanmazuki/
Current Address: Kajang, Malaysia

Driven and adaptable software engineer with a strong interest in understanding business needs, streamlining workflows, and delivering efficient, automated solutions. Passionate about combining technical expertise with business understanding to create impactful systems that enhance productivity and user experience. Actively seeking new opportunities that allow me to collaborate closely with stakeholders, analyse business processes, and build end-to-end solutions.

WORKING EXPERIENCE

Jan 2026 – Current

Executive (Upstream Architecture), PETRONAS DIGITAL Sdn Bhd

Supporting Upstream digital initiatives through architecture discovery, solution alignment, and governance enablement. Experienced in translating business and operational demands into architecture-aligned options, ensuring compliance with PETRONAS Enterprise Architecture standards while supporting delivery decision-making, opportunity management, and digital transformation initiatives across Upstream domains.

- **Enterprise Architecture Discovery & Analysis:** Supported EA Discovery activities for Upstream initiatives by assessing current-state architectures, identifying gaps, and mapping business requirements to application, data, and integration landscapes in alignment with PETRONAS EA principles.
- **Solution Architecture & Optioning Support:** Contributed to solution optioning (Build vs Buy), pre-TEV inputs, and high-level design assessments to support informed decision-making during project initiation and governance stages. Ensured proposed solutions align with Target Operating Environment (TOE) and enterprise standards.
- **Architecture Concurrence & Governance Enablement:** Supported architecture reviews and concurrence activities by consolidating technical inputs, evaluating solution alignment against EA standards, and coordinating with EA, security, and delivery stakeholders to meet governance and PGR requirements.
- **Opportunity Management (OM) Lifecycle Support:** Actively supported the OM lifecycle including opportunity assessment, categorization, status definition, focal coordination, and closure tracking. Ensured OM artefacts and statuses are governance-ready, traceable, and aligned with agreed completion criteria.
- **Digital & Innovation Initiative Enablement:** Supported Upstream digital, AI, and POC initiatives by providing architecture context, feasibility input, and alignment checks to ensure initiatives are scalable, compliant, and positioned for enterprise adoption where applicable.

Oct 2022 – Dec 2025

Executive (Software Engineering), PETRONAS DIGITAL Sdn Bhd

A versatile and results-oriented Software Engineer with experience in full-cycle software development, system integration, quality assurance, and cloud adoption. Proven ability to deliver reliable, secure, and scalable applications by applying strong engineering fundamentals, cross-team collaboration, and continuous learning.

Key Contributions:

- **Full-Stack Development**: Built and maintained enterprise web applications using modern frameworks and tools. Contributed to both front-end interfaces and back-end services while ensuring code maintainability and scalability and led a team to develop 4 high profile project worth of 5 million.
- **System Integration**: Led integration of core enterprise systems including Single Sign-On (SSO), SharePoint, and SMTP, Application Performance Monitoring across multiple environments (Development, Staging, Production).

- **Testing & Quality Assurance**: Applied a mix of manual and automated testing practices, executing over 500 regression and integration test cases in high-pressure scenarios to ensure bug-free releases.
- **Cloud & DevOps**: Leverage cloud such as AWS and Azure for cloud deployment, service configuration, and DevOps practices such as automated CI/CD pipelines.
- **Cybersecurity Practices**: Collaborated with the Cybersecurity team to remediate vulnerabilities and validate false positives from application scans, ensuring compliance with enterprise security standards.

Mar 2020 – May 2025

Curriculum Advisor, Debug Lab Skills Learning Center

I developed structured learning paths in full-stack web development, covering HTML, CSS, JavaScript, and PHP. I also built a gamification platform to boost student engagement through quizzes and leaderboards, maintained the website, and automated internal workflows to improve teaching efficiency. I also mentored junior instructors and supported branding efforts, contributing to Debug Lab's growth as a modern tech education centre.

July 2017 – April 2018

Software Engineer, Enotaker Technology Sdn Bhd

I was responsible for maintaining and enhancing a C#.NET-based system, ensuring stability while integrating new modules to meet evolving business needs. I took the lead in developing robust ASP.NET Web APIs to support the launch of a new Android and iOS mobile app, playing a key role in backend development using C#.NET. Beyond coding, I translated complex business requirements into clear, actionable documentation using UML diagrams and structured tables—bridging communication between technical teams and stakeholders and accelerating development cycles.

Jan 2015 – Dec 2016

System Developer Intern, Perbadanan Insurans Deposit Malaysia (PIDM)

Participated in in-house developed system enhancement projects, tasks including study existing system program. Also participated in requirement analysis & system design development programming, system testing, support user acceptance test and system documentation.

CERTIFICATIONS

2024

Microsoft Certified: Azure Fundamentals (AZ-900)

Demonstrated foundational knowledge of cloud concepts, Azure services, security, privacy, and pricing models.

Jan 2022 – April 2022

APU Certified Data Analyst Associate - ACDAA

This is a undergoing training certification programme sponsored under Yayasan Peneraju. The certification includes Certified Entry Level Python Programmer (PCEP) by Python Institute, Microsoft Certified: Data Analyst Associate (Microsoft Azure Data Fundamentals & Analyzing Data using Power BI) and APU Certified Data Analyst Associate (ACDAA).

2018

CCNA1 / CCNA2 Certification, Cisco Networking Academy

Foundation in Network System and Technology. Introduction to Networking and Routing and Switching Essentials CCNA courses, cabling, network standards.

EDUCATION

Sep 2018 – Feb 2022

BSc Computer Science (Sofware Engineering), Universiti of Malaya

CGPA: 3.57/4.00 MUET: Band 4

Related Coursework: WIF3001 (Software Testing), WIF3002 (Sofware Process & Quality), WIF3004 (Software Architecture & Design Paradigm), WIF3005 (Software Maintenance & Evolution), WIF3006 (Component-based Software Engineering)

July 2017 – April 2018

Foundation in Physical Science, University of Malaya

CGPA: 4.00/4.00

Jan 2015 – Dec 2016

Sijil Pelajaran Malaysia, SMK Kompleks Mengabang Telipot, Terengganu

SPM: 4A+ 3A 2A- 1B+

AWARDS & SCHOLARSHIP

2017 **Biasiswa Program Ijazah Muda, Perbadanan Insurans Deposit Malaysia (PIDM)**

Granted a scholarship from Perbadanan Insurans Deposit Malaysia to pursue my undergraduate study in Bsc Computer Science (Software Engineering)

TECHNOLOGY SUMMARY

Languages & Frameworks: OutSystems, C#.NET, PHP, Python, ASP.NET, Visual Basic (VB), JavaScript, HTML, CSS/LESS/SASS, Bootstrap, MVC, Entity Framework, React, Vue, Flutter, Wordpress, Linux

Databases & BI: SQL Server, MySQL, Power BI, SQL Server 2019

Tools & Platforms: GitHub, Docker, UML, Azure (Entra ID, SMTP, SharePoint integration), AWS (Cloud Practitioner), Katalon Studio

Practices & Methodologies: Agile, DevOps, Test-Driven Development (TDD), Regression/Integration Testing, CI/CD, Secure Software Development Lifecycle (SSDL)
